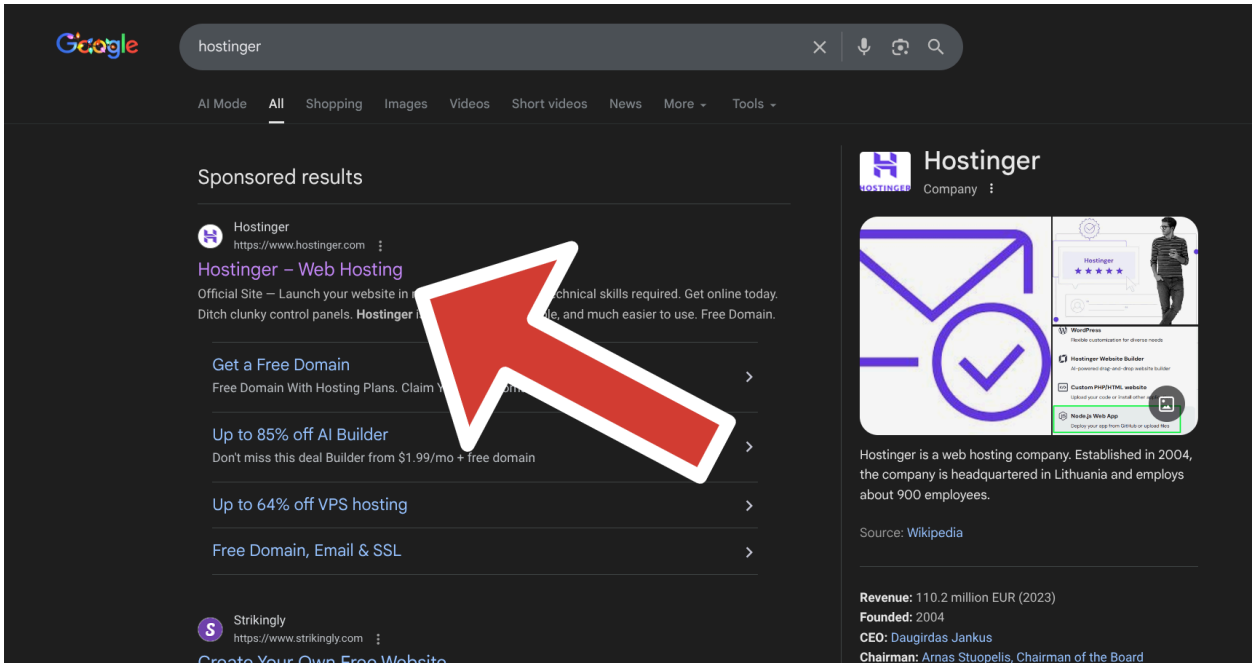
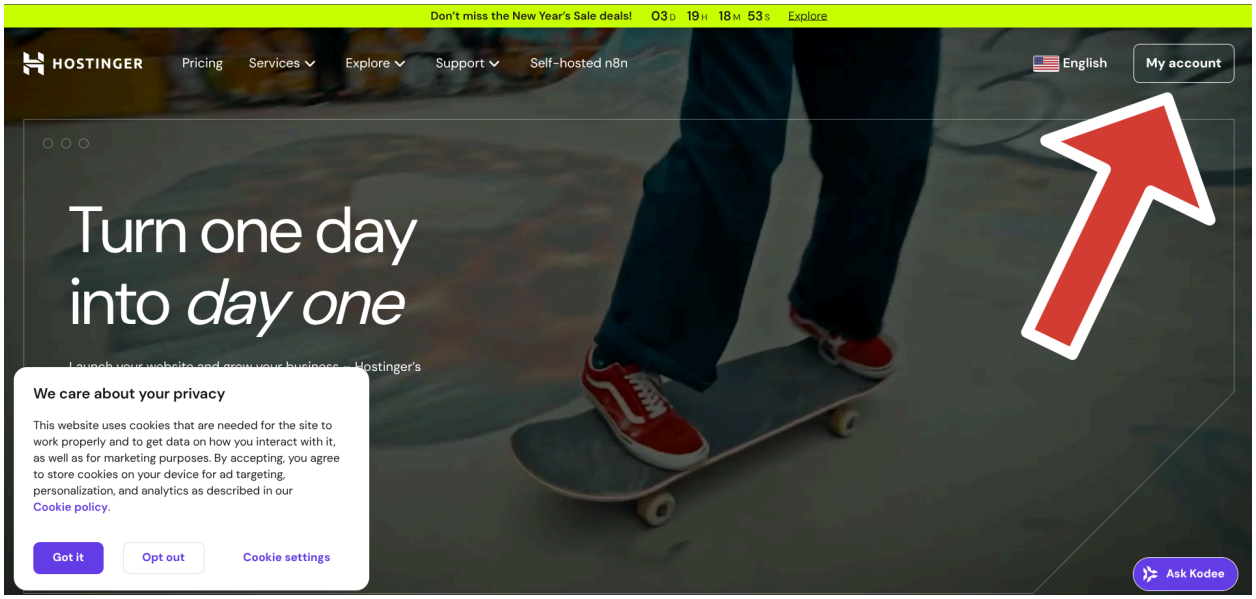
How To Setup Your Hostinger Account

Step #1:
Navigate to hostinger.com

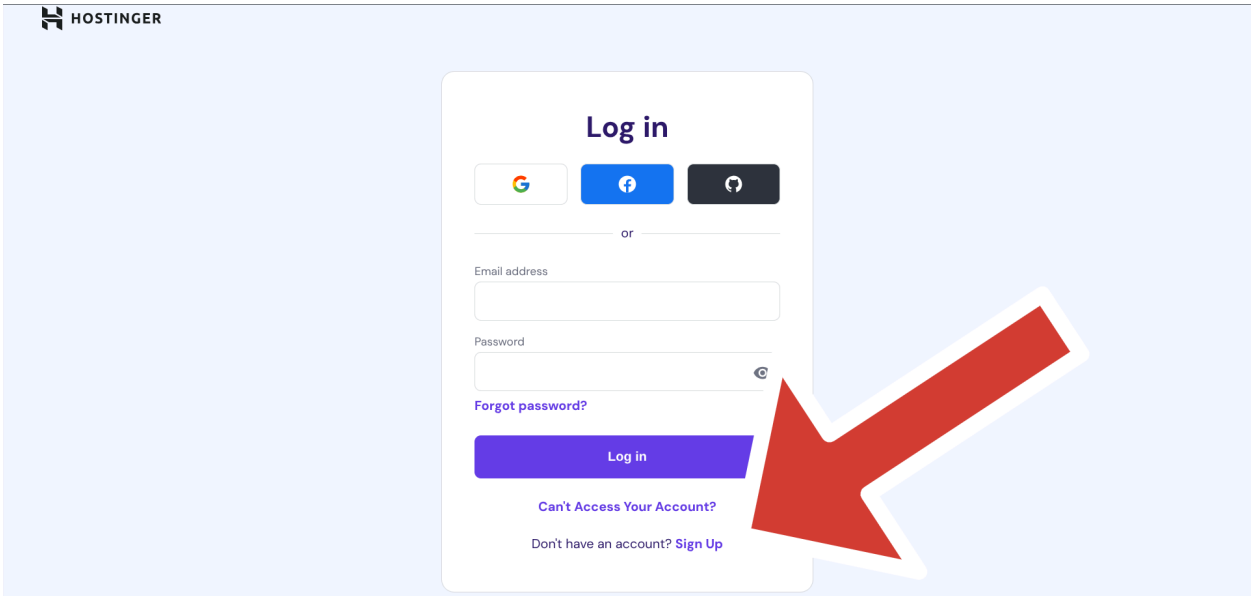


Step #2:
Once the page has loaded, click **My Account** in the top right hand side of the screen



You might be prompted to verify you are not a robot, this is entirely normal.

Step #3:
When the page has loaded, locate the Sign Up button. ***DO NOT SIGN UP USING GOOGLE OR ANY THIRD-PARTY CONNECTORS.***



If you do sign up using your Google account or an account similar, it prohibits our ability to access your Hostinger account.

Step #4:

When the register page loads, **DO NOT SIGN UP USING GOOGLE OR ANY THIRD-PARTY CONNECTORS.** Instead, enter your details manually.

Step-by-Step:

1. Email Address Enter the email address that is listed in your client portal. This ensures we can match your hosting account to your project.

2. Password Choose a **temporary password** for now. This will be a password you use only for the initial setup process.

Important: You will change this password to a permanent, secure password of your choice after we complete the hosting configuration and hand over full control of your account.

Why a temporary password?

- We need temporary access to configure your hosting, install your website, and optimize settings
- Once setup is complete, you'll change it to a password only you know
- This ensures your long-term security while allowing us to complete the technical setup

Recommended temporary password format:

- Something simple you can remember for a few days
- Example: TempPass2025! or Setup123!
- You'll only need this password for 2-3 days during setup

3. After Registration Once you've created your account with your email and temporary password, you'll submit these credentials through your client portal so we can begin the hosting configuration.

Enter image of client portal submission

Step #5:

After your account is created, you'll be prompted to fill out information about your business. The first form will ask for your address—**enter your business address, not your personal address.** Once you've completed the form, you'll arrive at your Hostinger dashboard. You'll see a sidebar on the left with 9 navigation buttons. Locate and click on the **"Domains"** button (it may already be selected by default). When you click on it, you should see a screen similar to this:
